Automated Coin & Currency Handling Equipment & Supplies At Great Prices

## Bill Breaker

Quite simply, the BILL BREAKER changes large denomination bills into smaller ones. It provides automated currency exchange for your highest volume customer service areas. Now currency changing for slot customers and currency for replenishment for slot personnel can all be handled with one machine that is both small enough and inexpensive enough to be placed throughout the casino floor.

Labor costs are significantly reduced, service availability for your slot players becomes more consistent and most importantly, customer waiting time for change is drastically reduced. Proven and dependable, with over 125 units in 15 casinos in North America, the BILL BREAKER is the obvious device to support your BV's.
