## 6300 Series

FOR FOLDING & INSERTING

### Standard Features

- Three fully automatic insert stations
- AutoSet - one touch setup
- Clamshell design for easy access
- Fully automatic adjustments
- Nine programmable fold applications
- User friendly display for easy set-up
- Seal and non-seal capabilities
- Two counters - one resettable for addition and batch counting and one non-resettable
- Four adjustable insert fingers
- Double document detection
- Folds and inserts up to five sheets of paper
- Fold types: C, V, Z and Double Parallel

### Abilities:

- Fold and/or insert sheets, business reply envelopes and cards automatically in almost any combination
- Multifeeding - Allows for a set number of pieces to be pulled from one feeder, then collated and inserted automatically
- Folding only without inserting
- Daily post mode for inserting stapled sets

### Options:

- OMR - Optical Mark Recognition
- Conveyor
- Side Exit Tray
- Cabinet Stand

*Shown w/ optional Conveyor & Cabinet*

## Fully Automatic 3 Station Folder/Inserter

The 6300 Series Folder/Inserters offer two models for your specific job needs. The FD 6300-Standard 3 comes with three standard automatically adjusting feed stations. The FD 6300-Special 3 has two standard feeders and one special feeder that can be manually adjusted for glossy and thicker stock. The 6300 Series is ideal for processing documents in a timely and hassle free manner. The versatility of this unit allows for processing forms of various lengths and thickness all at the same time. The exclusive AutoSet feature makes processing forms a snap by automatically setting the paper length, paper thickness, fold type, envelope size and double document detection.

## Flexible

The 6300 Series is available in two models to meet your specific processing needs. A variety of documents up to 14", including checks, invoices, newsletters and reply envelopes can be inserted in almost any combination. The FD 6300-Special 3 has a special feeder that allows for the insertion of glossy and thicker documents as well. An optional conveyor or side exit tray can be added to maximize your operator productivity.

## Powerful

The 6300 Series processes at a rate of up to 2,750 pieces per hour and can handle up to 325 sheets in each feeder. Feeders can be refilled on the fly allowing for continuous operation.

The cascade mode maximizes production by filling multiple feeders with the same documents. When one feeder empties another one automatically starts feeding. This feature allows for a total stacking capacity of up to 975 sheets. The enhanced folding system folds and inserts up to five documents at one time.

## Security

The 6300 Series has double document detectors located at each feed station to insure document integrity. The optional OMR capability allows for the insertion of multiple page documents automatically. OMR determines which documents go together into each envelope, eliminating the tedious task of manually collating and inserting.

## Ease of Operation

The AutoSet feature automatically detects and sets paper length, fold type, envelope size, fold length and double document detection. Simply load the documents into the feed hoppers and go. The 6300 Series also includes nine programmable fold settings for recurring or frequently processed applications. The drop-in feed system and easy access paper paths increase efficiency and maximizes output.

## Specifications:

Speed: Up to 2,750 pieces/hr

Feed Hoppers: Up to 325 sheets

Envelope Hopper: Up to 250 envelopes

Paper Size: 3 1/2" - 14" L x 5 1/8" - 9" W

Envelope Size: 3 1/2" - 6 3/8" L x 6 1/4" - 9 3/4" W

Dimensions: 16 1/2" W x 53" L x 26" H

Weight: 226 lbs.

Duty Cycle: Up to 30,000 per month

Voltage: 100 - 120 Volts (50/60 Hz)

Safety Certifications: UL

\* All paper & envelope specifications may vary. All media must be tested.

User Friendly Control Panel

The control panel makes operation a breeze with pictographs and one-touch selections

Horizontal feeders with a loading capacity of up to 325 sheets each

The **FD 400 Jogger** is a recommended option that reduces static electricity from forms and aligns them for proper feeding.
