**CURRENCY COUNTER Model 20**

The Model 20 Currency Counter offers outstanding performance at an affordable price. For basic currency counting applications the unit is fast, accurate, and easy to use. Compact, durable, and highly portable, the Model 20 is a vast improvement over tedious hand counting methods or the frustration of old technology.

**Features:**

- Speed (variable): 900 & 1200 NPM
- Batch presets at 100, 0 (off), 10, 20, 25, 50 and variable batching capability
- Automatic start
- Full error detection
- Large count and batch LED displays
- Add mode allows cumulative counts
- RS232 interface

Source - 85 to 264V AC 50/60Hz

Features and specifications subject to change

CURRENCY COUNTER Model 20TM

The 20TM utilizes the same proven technology as the widely accepted MAG II Model 20 Currency Counter but also offers 'upscale' features such as a full numeric keypad and magnetic counterfeit detection. With otherwise similar features to the basic Model 20, the Model 20TM Currency Counter offers reliability and simplicity of operation in currency processing applications requiring a higher level of performance.
