## **Magner Model 35 Currency Counter**

The Magner Model 35 Currency Counter was designed for basic currency counting applications, reliability, and simplicity of operation.

High quality control ensures consistency in the manufacturing of our products and has been instrumental in making the Magner Model 35 the number one selling currency counter worldwide.

The Model 35 operates at 1,300 documents per minute and features touch sensitive controls, automatic start, user adjustable batch stops and a grand total accumulation of all notes counted.

### **MAGNER Model 35 features include:**

- . 300 note input hopper capacity
- . Variable batching from 1 to 999 notes
- . 4 digit LED display and numeric keypad
- . Microprocessor controlled operation
- . Auto diagnostic test modes
- . 16 ranges of selectable density settings
- . Error detection of half note, double note, chain note, hopper jam, over count, under count, and door open errors

## **Magner Model 35-3 Currency Counter**

The 35-3 offers the quality and performance you have come to expect from the MAGNER® 35 Series, the longest produced, #1 selling currency counter in the world... EVER!

One word best describes the Model 35-3... overachiever. It is a compact premium Currency Counter designed for outstanding performance in basic currency processing applications. It offers simplicity of operation and a host of standard features such as selectable speeds up to 1500 notes per minute, automatic start, variable batching, accumulation mode and full error detection. Designed from the beginning for superior reliability and

dependability, the Model 35-3 is engineered to deliver MAGNER quality performance for the long haul.

### **MAGNER Model 35-3 features offers:**

- . Variable batching
- . Full 10-key pad
- . Three selectable speeds (600/1200/1500 notes/minute)
- . Full error detection
- . Three operating modes - Count, Batch, Accumulate
- . 5 density level settings
- . Integrated carrying handle (molded into case)
- . Large LCD Displays (for total and batch)
- . Automatic or manual start function

## ***Magner Model 75 and 75V Currency Counters***

The 75 series offers the technology, performance, and productivity you expect from Magner - the global leader in table-top currency counters. With a wide range of features and options, the 75 Series is also designed for rugged reliability, even in the most demanding applications.

The 75 Series provides accurate high speed processing at 1.500 notes per minute, simplicity of operation and advanced currency authentication and detection capabilities.

Choose from a basic model with variable batching or a more advanced model with dual head, dual threshold magnetic counterfeit detection, or ultraviolet detection. You can have both in combination should your application require it!

The Model 75V is a high-throughput note counter capable of extending the dollar value of currency denominations and tracking totals at the denomination, batch, and grand levels. Equipped with an optional printer, the 75V provides a detailed audit trail for improved control of cash counting and balancing operations.

The Model 75MV offers all the capabilities of the 75V along with Magner's field-proven dual magnetic detection technology. Whether you are balancing deposits or preparing them, the 75V and MV will help you do the job more efficiently and productively than ever before.

## **Magner 75ED External Display**

The optional 75ED External Display for the 75 Series currency counter family incorporates a large green LED readout to remotely display the number of notes counted.
