Magner Model 920 Coin Packager/Counter

The Model 920 counts a single coin denomination at 1,700 coins per minute and produces either coin rolls or bagged coin output.

The unit offers operator adjustable precise bag stops, simple adjustment for denomination change over, and small coin off-sort for non-stop processing.

Golden Dollar

Compatible

The **Magner Model 920 Packager/Counter** at only 15 pounds is highly portable and extremely reliable.

Model 920 Options include a carrying handle, an off-sort bagging attachment, and coin tubes for United States or Canadian coin denominations.

The Model 920 can process coins or tokens from .55 inches in diameter to 1.34 inches in any quantity from 1 to 9999 with exacting precision.

Magner Model 930 Coin Verifier

The **Magner Model 930 Packager/Counter**, similar to the model 920, offers an increased hopper capacity of 4,000 coins and an automatic feed system.

It is ideal for bulk coin verification applications.
