WYCOM/Elite check signers provide comprehensive check printing solutions for both laser and dot matrix printers. The **WYCOM/Elite** works effortlessly with your existing computer system to sign, protect, add logos, add graphics, add forms, add MICR numbers and produce a complete, finished, negotiable check from either blank or pre-printed check stock while providing simple, yet powerful key-based security control.

Are you using pre-printed laser check stock? The **WYCOM/Elite** check signer can add signatures and protected graphic amounts. In addition, since the **WYCOM/Elite** can electronically duplicate your pre-printed check stock, you can convert to blank check stock with the **WYCOM/MICR Laser Check Printing** option! Imagine never running out of pre-printed check stock! Imagine stocking only blank check stock for every account you manage!

Are you already using blank laser check stock? The **WYCOM/Elite** is fully capable of generating a complete, signed, protected check, and the **WYCOM/Elite** with the **WYCOM/MICR Laser Check Printing** option is for you!

Are you currently using a Dot Matrix printer? The **WYCOM/Elite** eliminates

Features:

- For Laser or Dot Matrix printers
- Uses either blank (MICR Check Printing option) or pre-printed check stock
- Automatically prints and signs checks in a single pass directly off the printer
- Up to 3 signatures per check
- Signature titles and backgrounds available
- Optional protected amount only printing (when you do not want a signature)
- Up to 8 different accounts (e.g., Payroll, Accounts Payable, Share Draft, Purchase Orders, etc.)
- 8 non-resettable counters keep an accurate tally of checks for audit control
- Count signed checks, count voided checks, or count all checks
- 2 (Dual-lock) keys for enhanced security Authorized signature can be "locked out" to prevent unauthorized signing of checks
- Suppresses signatures if over a pre-determined dollar amount
- Adds a forge-resistant protected graphic amount while printing
- Provides amount limits (add signature at amount, suppress signature at amount, VOID at amount)
- Offline Continuous Form Signer Mode, with or without keyboard
- Protects against forgery and alteration
- Saves time and offers greater efficiency
- Produces a "manual check" without a computer in the event your computer system goes down
- Eliminates signature plates, rubber stamps and continuous form signers
- Provides a simple upgrade path for Dot Matrix customers to print to Laser printers

With the MICR Laser Check Printing option:

- Adds forms, graphics & logos
- Adds MICR numbers
- Can produce non-negotiable check copies
- [...more](#)

rubber stamps, signature plates and continuous form signers, and provides a completely upgradeable solution! The WYCOM/*Elite* can easily sign and protect checks on a Dot Matrix printer. In the future, would you like to print to a laser printer? With the WYCOM/*Dot Matrix to Laser Conversion*, the WYCOM/*Elite* can instantly convert dot matrix data to laser printer data. You can print beautiful, high quality, professional laser checks from blank laser check stock ***without making any changes to your application software!***

The WYCOM/*Elite* check signer integrates easily with nearly all Dot Matrix printers, and with most HP-compatible laser printers.

The WYCOM/*Elite* creates checks in a single-pass, and provides Wycom's standard dual-key security, integrated amount limit checking, non-resettable counters, manual check generation, and a host of features designed to provide confidence in your check signing solution.

Wycom products have proven reliable and robust in thousands of installations. For more information contact Wycom at 1-800-869-0236 or [Contact Us](#).
